

Desk & wall mount battery powered display

Temperature and Relative Humidity

Specifications

- Range: -5 +50.0 °C
- Temperature accuracy $\pm 1^\circ\text{C}$
- Range 10-95%RH
- RH accuracy $\pm 5\%$
- Power 1x 1.5V AAA battery
- MAX/MIN memory with reset

Measurement of temperature and relative humidity with large display incorporating a digital clock for utility. Display resolution is 0.1 °C on temperature and 1% on RH and temperature accuracy complies with the requirements for food safety applications in New Zealand.

The HT02 has memory function with MAX/MIN recall and reset (clear). ECEFast can supply this instrument with NATA certification on temperature and humidity. This is a low-cost instrument and if you require high specification measurements of these parameters then consider EE-02 which is an attractive wall or bench mount display with $\pm 2\%$ RH and 0.3C accuracy.

Size 105 X 98 X 24mm; Weight 170 gm.
