

TNCOMBO: Two For The Price Of One - A Combined Infrared & Contact Thermometer

Features

- Perfect for Food & HACCP temperature monitoring
- Fast Response
- Infrared unit with 1°C accuracy
- Laser sight technology
- Built-in connectivity for K-type probes
- LED Food safety alert System
- Comfortable design

AT LAST!! A truly versatile Infrared thermometer at a price that will not break the bank.

In addition to its fast response, 1°C accuracy & ability to indicate if a product is within food safety requirements, you can connect a standard K type thermocouple probe.

Purchase the infrared thermometer on its own or consider a probe from one of many available exclusively from ECEFast

Specifications

INFRARED	
Measurement range	-55~250°C (-67~482°F)
Full Range Accuracy	-33~0: +/- (1°C+0.1/degree) 0~ 65: +/-1°C 65~250: +/-1.5% of reading
Distance to spot ratio	12:1
Available Modes	Max, Min, Lock
K TYPE INPUT	
Measurement range	-55~330°C (-67~626°F)
Full Range Accuracy	+/-1°C (+/-1.8°F) or 1% reading

TNCOMBO and accessories

- CH-AZ-TNCOMBO** IR/K thermometer
- LU-CA05** Soft carry case
- TS-TP09** Insertion probe
- TS-TP10** Fast response insertion probe
- TK-TNCOMBO** Complete Kit thermometer, insertion probe & case
