

Desk & wall mount battery powered display

Dual Temperature and Relative Humidity

- Internal temp range: 0 .. 60°C
- Remote probe temp range: -50..+70°C
- Temperature resolution 0.1°C
- Temperature accuracy $\pm 1^{\circ}\text{C}$
- Humidity range 10-99%
- Humidity accuracy $\pm 3\%$
- Digital LCD clock display
- MAX/MIN on temperature

Part Number: CH-AZMT09-RH/TIM

This economical battery powered display has the main feature of internal/external temperature, and so can monitor temperatures inside enclosures such as food storage cabinets, while also displaying ambient conditions and the time. The MIN/MAX memory function means you can record the temperature extremes reached since the last memory RESET.

It can be wall mounted or sit on a horizontal surface and is powered by three standard AAA batteries. Set up buttons are on the rear of the case.
