

Bacterial contamination can be a problem in the work place. Minimise this risk by using NZFSA Approved/AssureQuality Assessed Sygnet Anti-Bacterial General-Purpose Wipes.

These Wipes are ideal for:

1. For cleaning and sanitizing work surfaces and equipment in Supermarkets, Freezing Works, Cool Stores, Fish and Game Processing Factories and the Dairy Industry.
2. For cleaning Food Probes where they are required to monitor the Temperature during processing.

The NZFSA Approval is a New Zealand approval from the New Zealand Food Safety Authority and is under NZFSA Approved Category C 44 (All animal products except dairy).

The AssureQuality Assessment is a New Zealand approval from Global Proficiency Limited and the assessment is for food, beverage, and dairy factories contact surfaces (reference H1449)

All chemicals used in the formulation for these wipes comply with the US Food & Drug Administration.

Cite: 21CFR178.1010 Sanitizing Solutions
